Logo Mark

basic variant

bright background option

Mark Construction

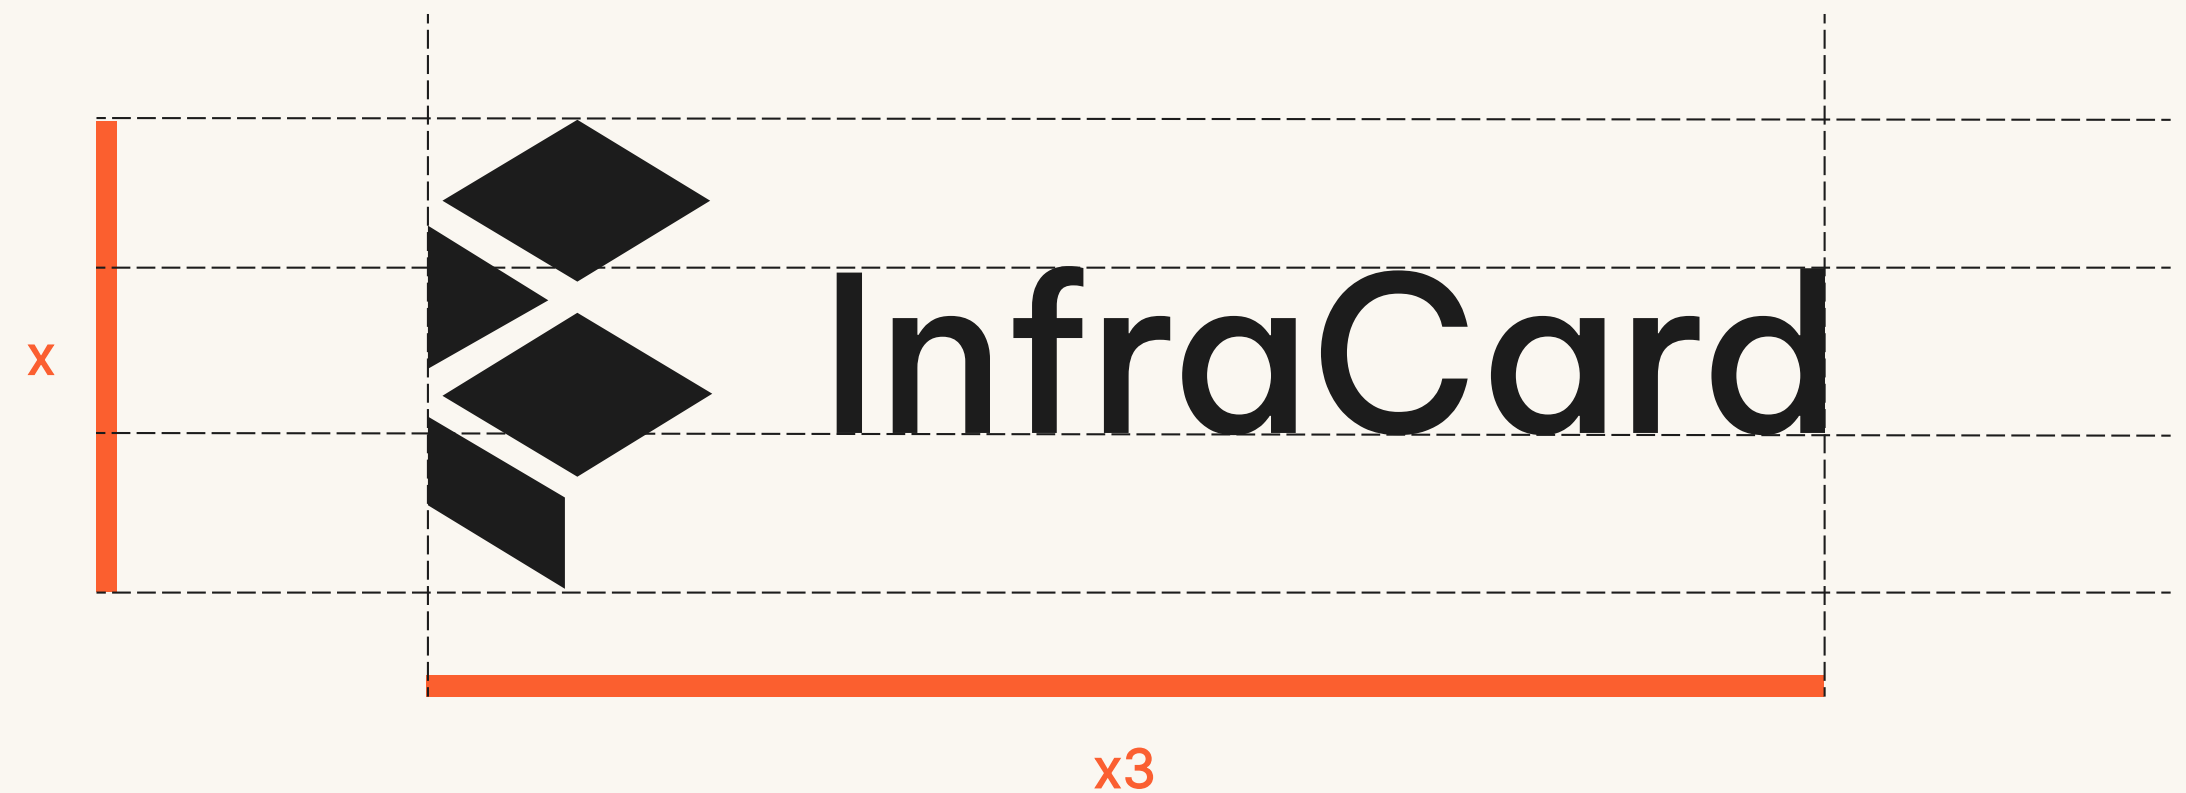

Horizontal Logo

The logo consists of a symbol and a typeface.
When the width is much greater than the height (from-strip), the logo of the design is used.

Full Logo Construction

Creation of a full logo that includes both a symbol and a text part. Depending on the format and area of use, the logo can be adapted accordingly.

Mono Color Logo

A Mono Color Logo is a design that uses only a single color, creating a clean, minimalist, and versatile look.

It enhances brand recognition by ensuring simplicity and adaptability across different backgrounds and materials. This style is perfect for modern, timeless branding.

Background logo

Alternative color combos. Here are different color ways we can do with the logo.

Thumbnail Mark

Compressed mark used for small scale
and where applicable.

Minimum Size

When significantly reduced, the logo will become illegible. These are the pixel size units we recommend staying within to preserve the quality of the logo.

Safe Zone

It's important to maintain proper spacing around the logo to avoid overcrowding. Also, the use of whitespace keeps the brand feeling clean.

Correct Logo Application

primary use

secondary use

secondary use

secondary use

Incorrect Logo Application

avoid rotating

avoid stretching

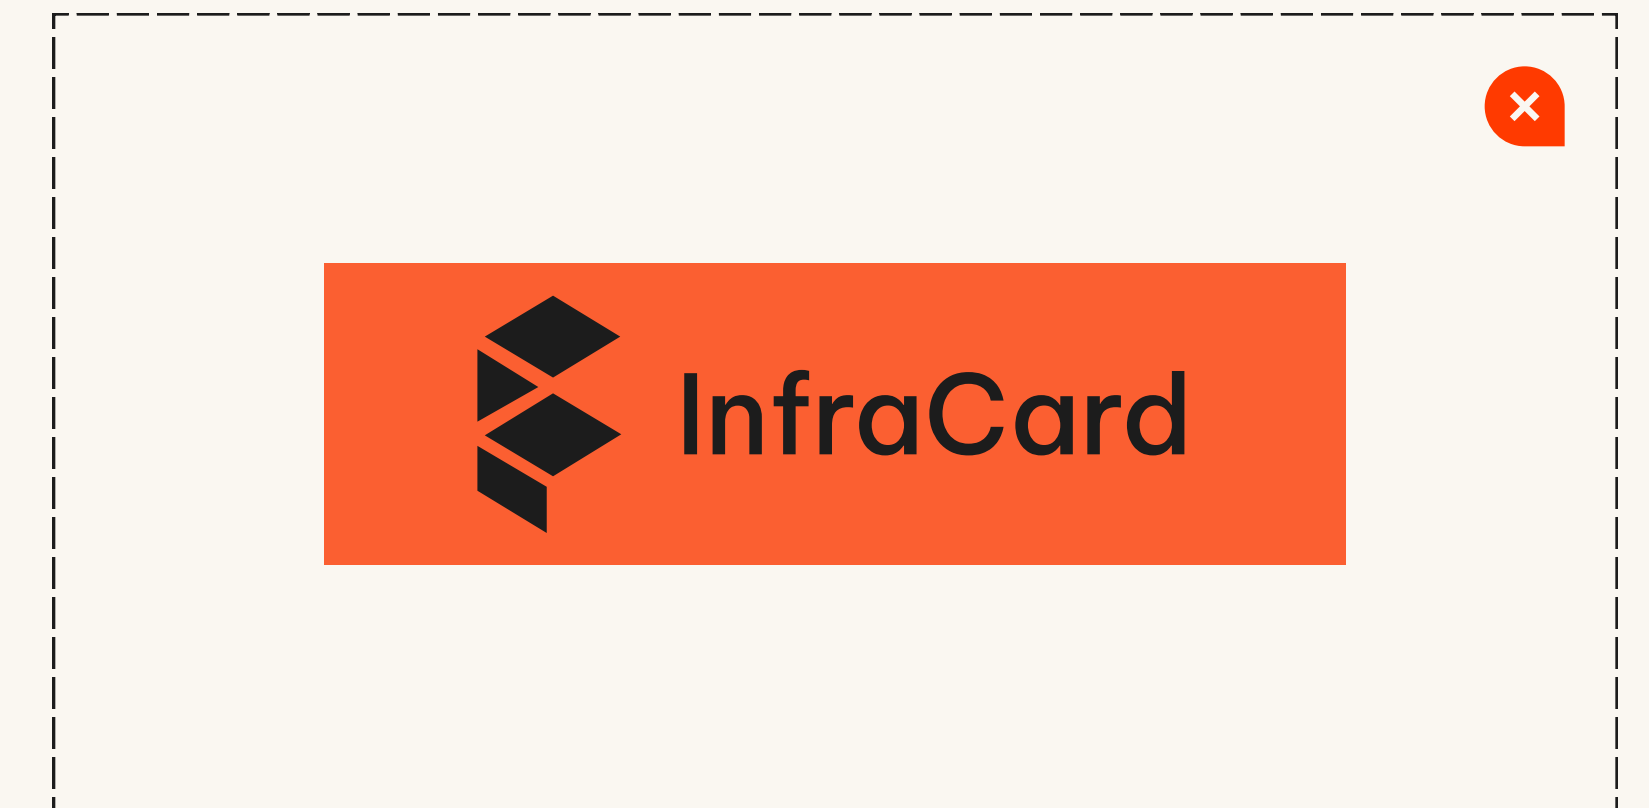

avoid using on busy backgrounds

avoid using off brand colors

avoid boxing in logo

Color Palette / CMYK

The core palette will cover the majority of your needs. It's intentionally small in variety so as to not dilute the brand visuals, which adds confusion.

Visual techniques

For the visual style, we can combine several key elements: **photography**, **geometric shapes** (triangles, medium-weight lines, grid modules), and **vector illustrations**. Below we'll show inspiration examples of what kinds of photos and graphic elements could work well in this style.

Please note: all images are sourced from Pinterest purely to demonstrate the concept and cannot be used in final materials.

Social media

Our focus will be on conveying technology, security and a modern approach through clean shapes and intentional compositions.

Every element will be custom-created for your brand. We'll generate photos using AI tools while incorporating your brand aesthetics, and have a professional illustrator develop the vector illustrations. This ensures complete originality while maintaining full alignment with your business style.

Social media

Please note: This image is from Pinterest for conceptual reference only and cannot be used in final materials.

Social Media Banner Sizes

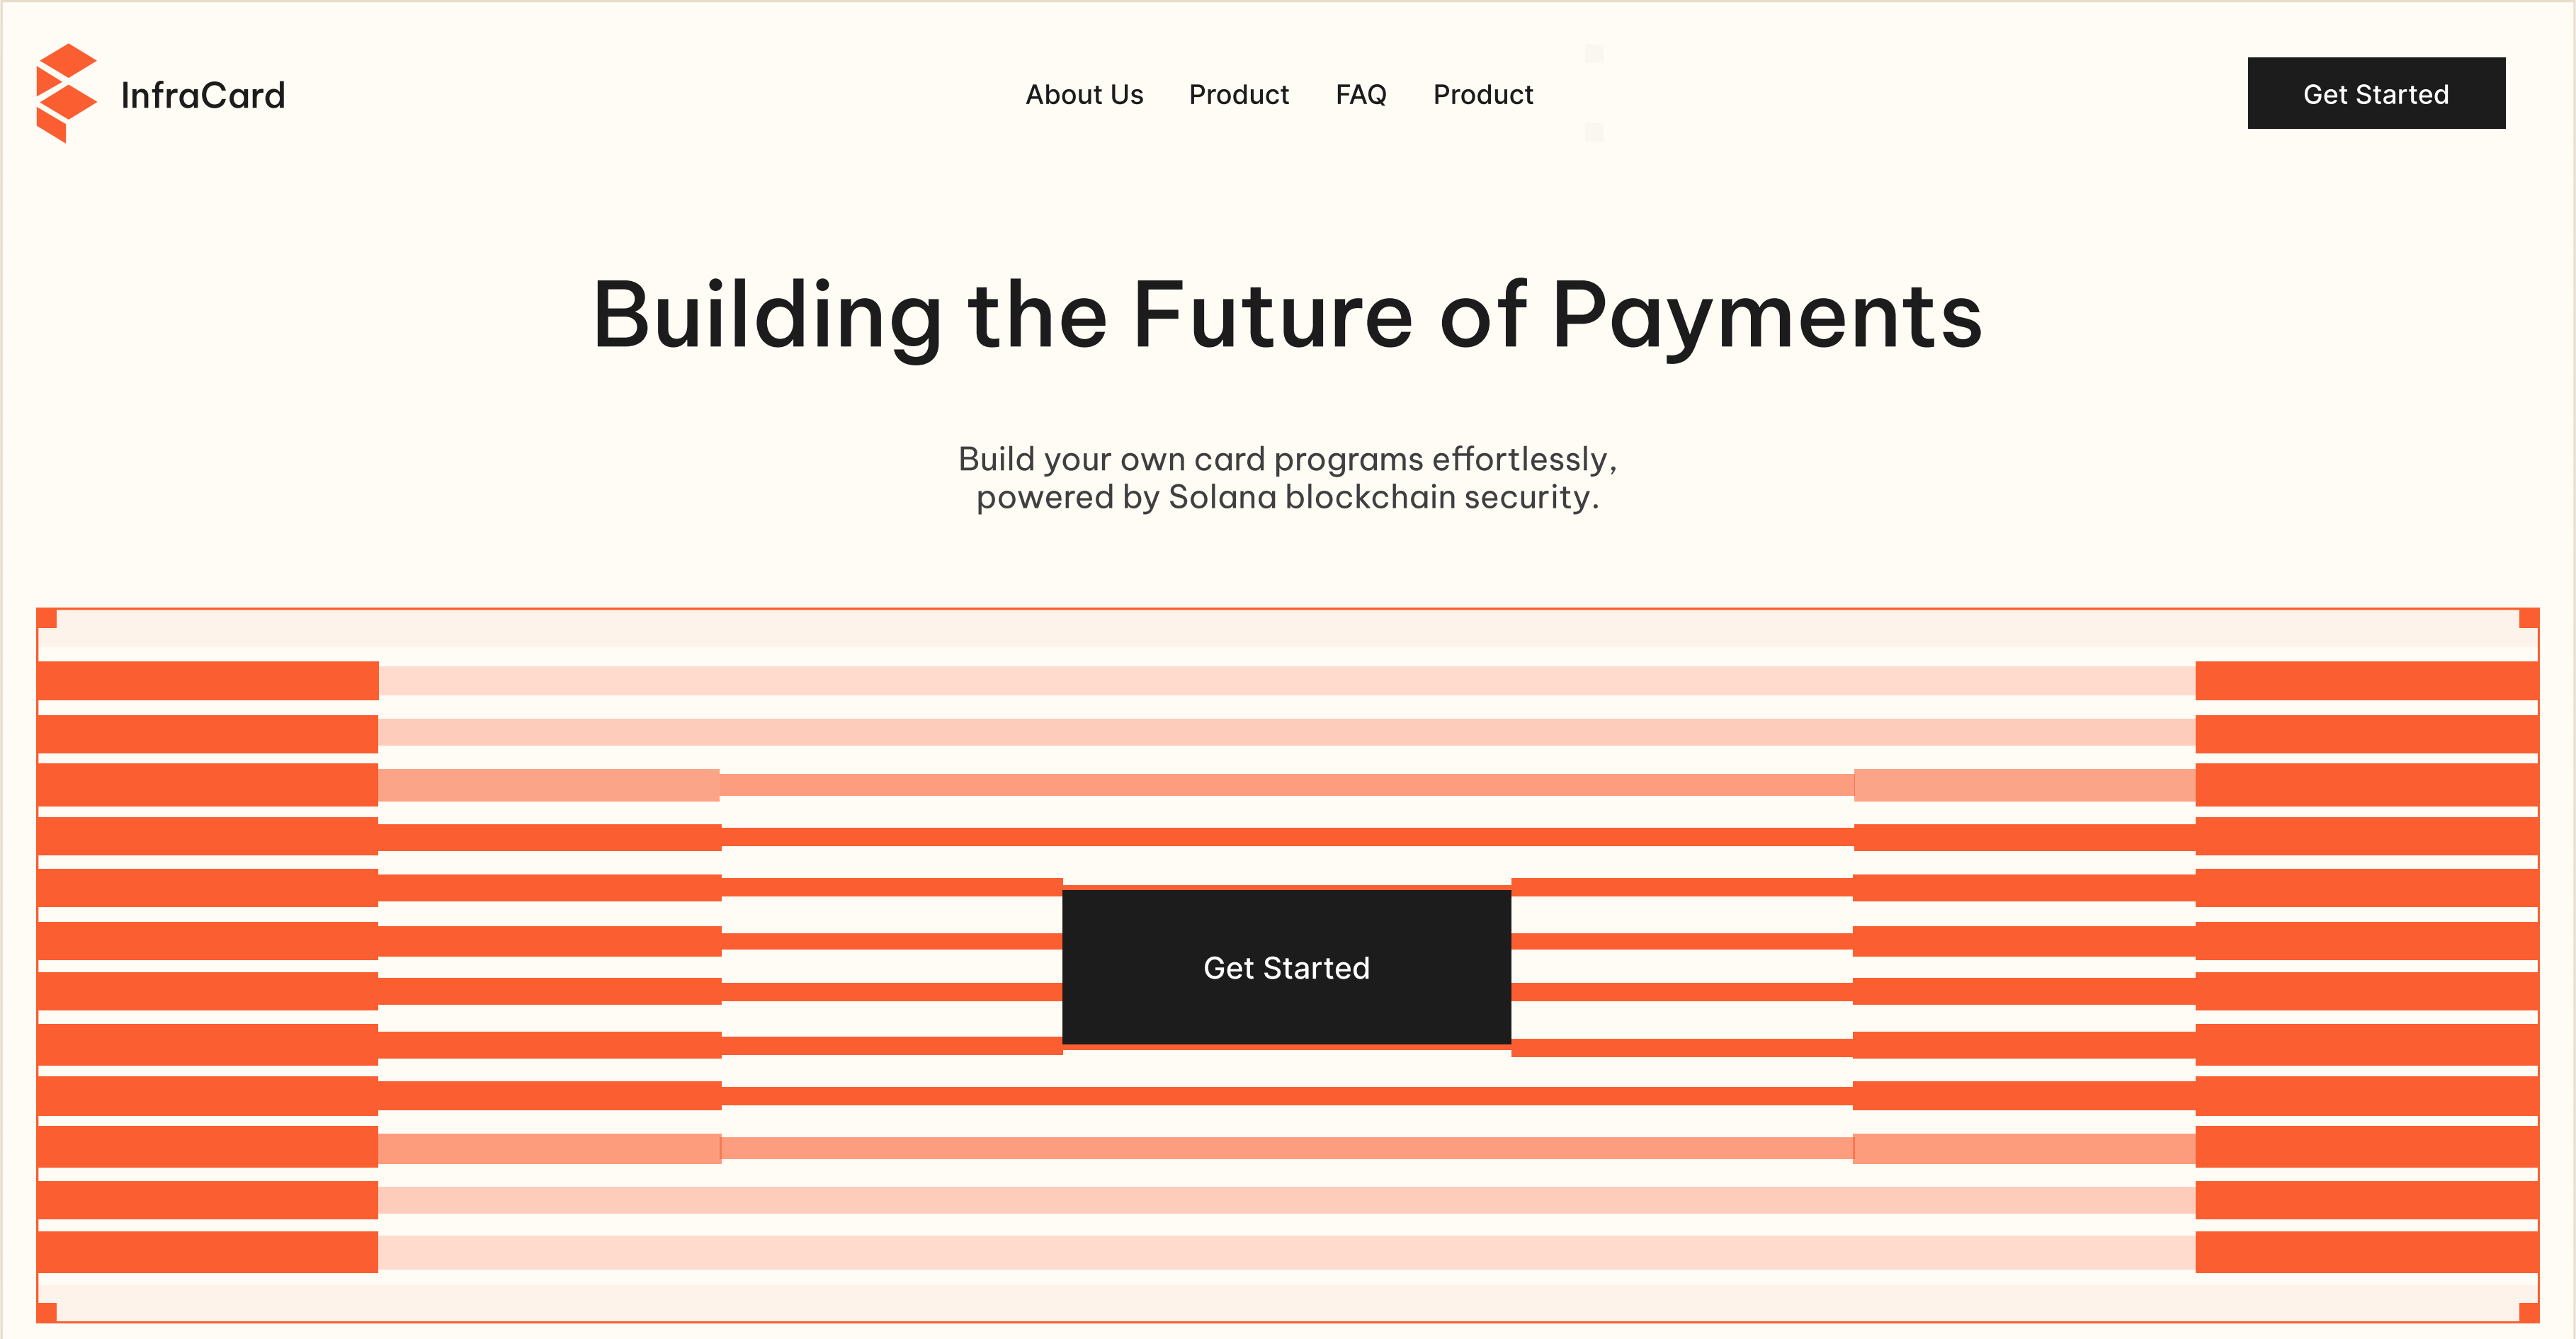

X / Twitter	Header	1500 × 500 px
Facebook	Cover Photo	1640 × 924 px
Instagram	Post	1080 × 1350 px
	Story / Reel	1080 × 1920 px
LinkedIn	Company Page Cover	1128 × 191 px
YouTube	Channel Art	2560 × 1440 px

Pro Tip: Export visuals in high resolution (PNG or JPG, 72–150 dpi). Keep text and key elements within the safe zone to prevent cropping on different devices.

Safe Zone Reminder: Keep key elements (text, faces, CTAs) within the central safe area to avoid unexpected cropping on different devices.

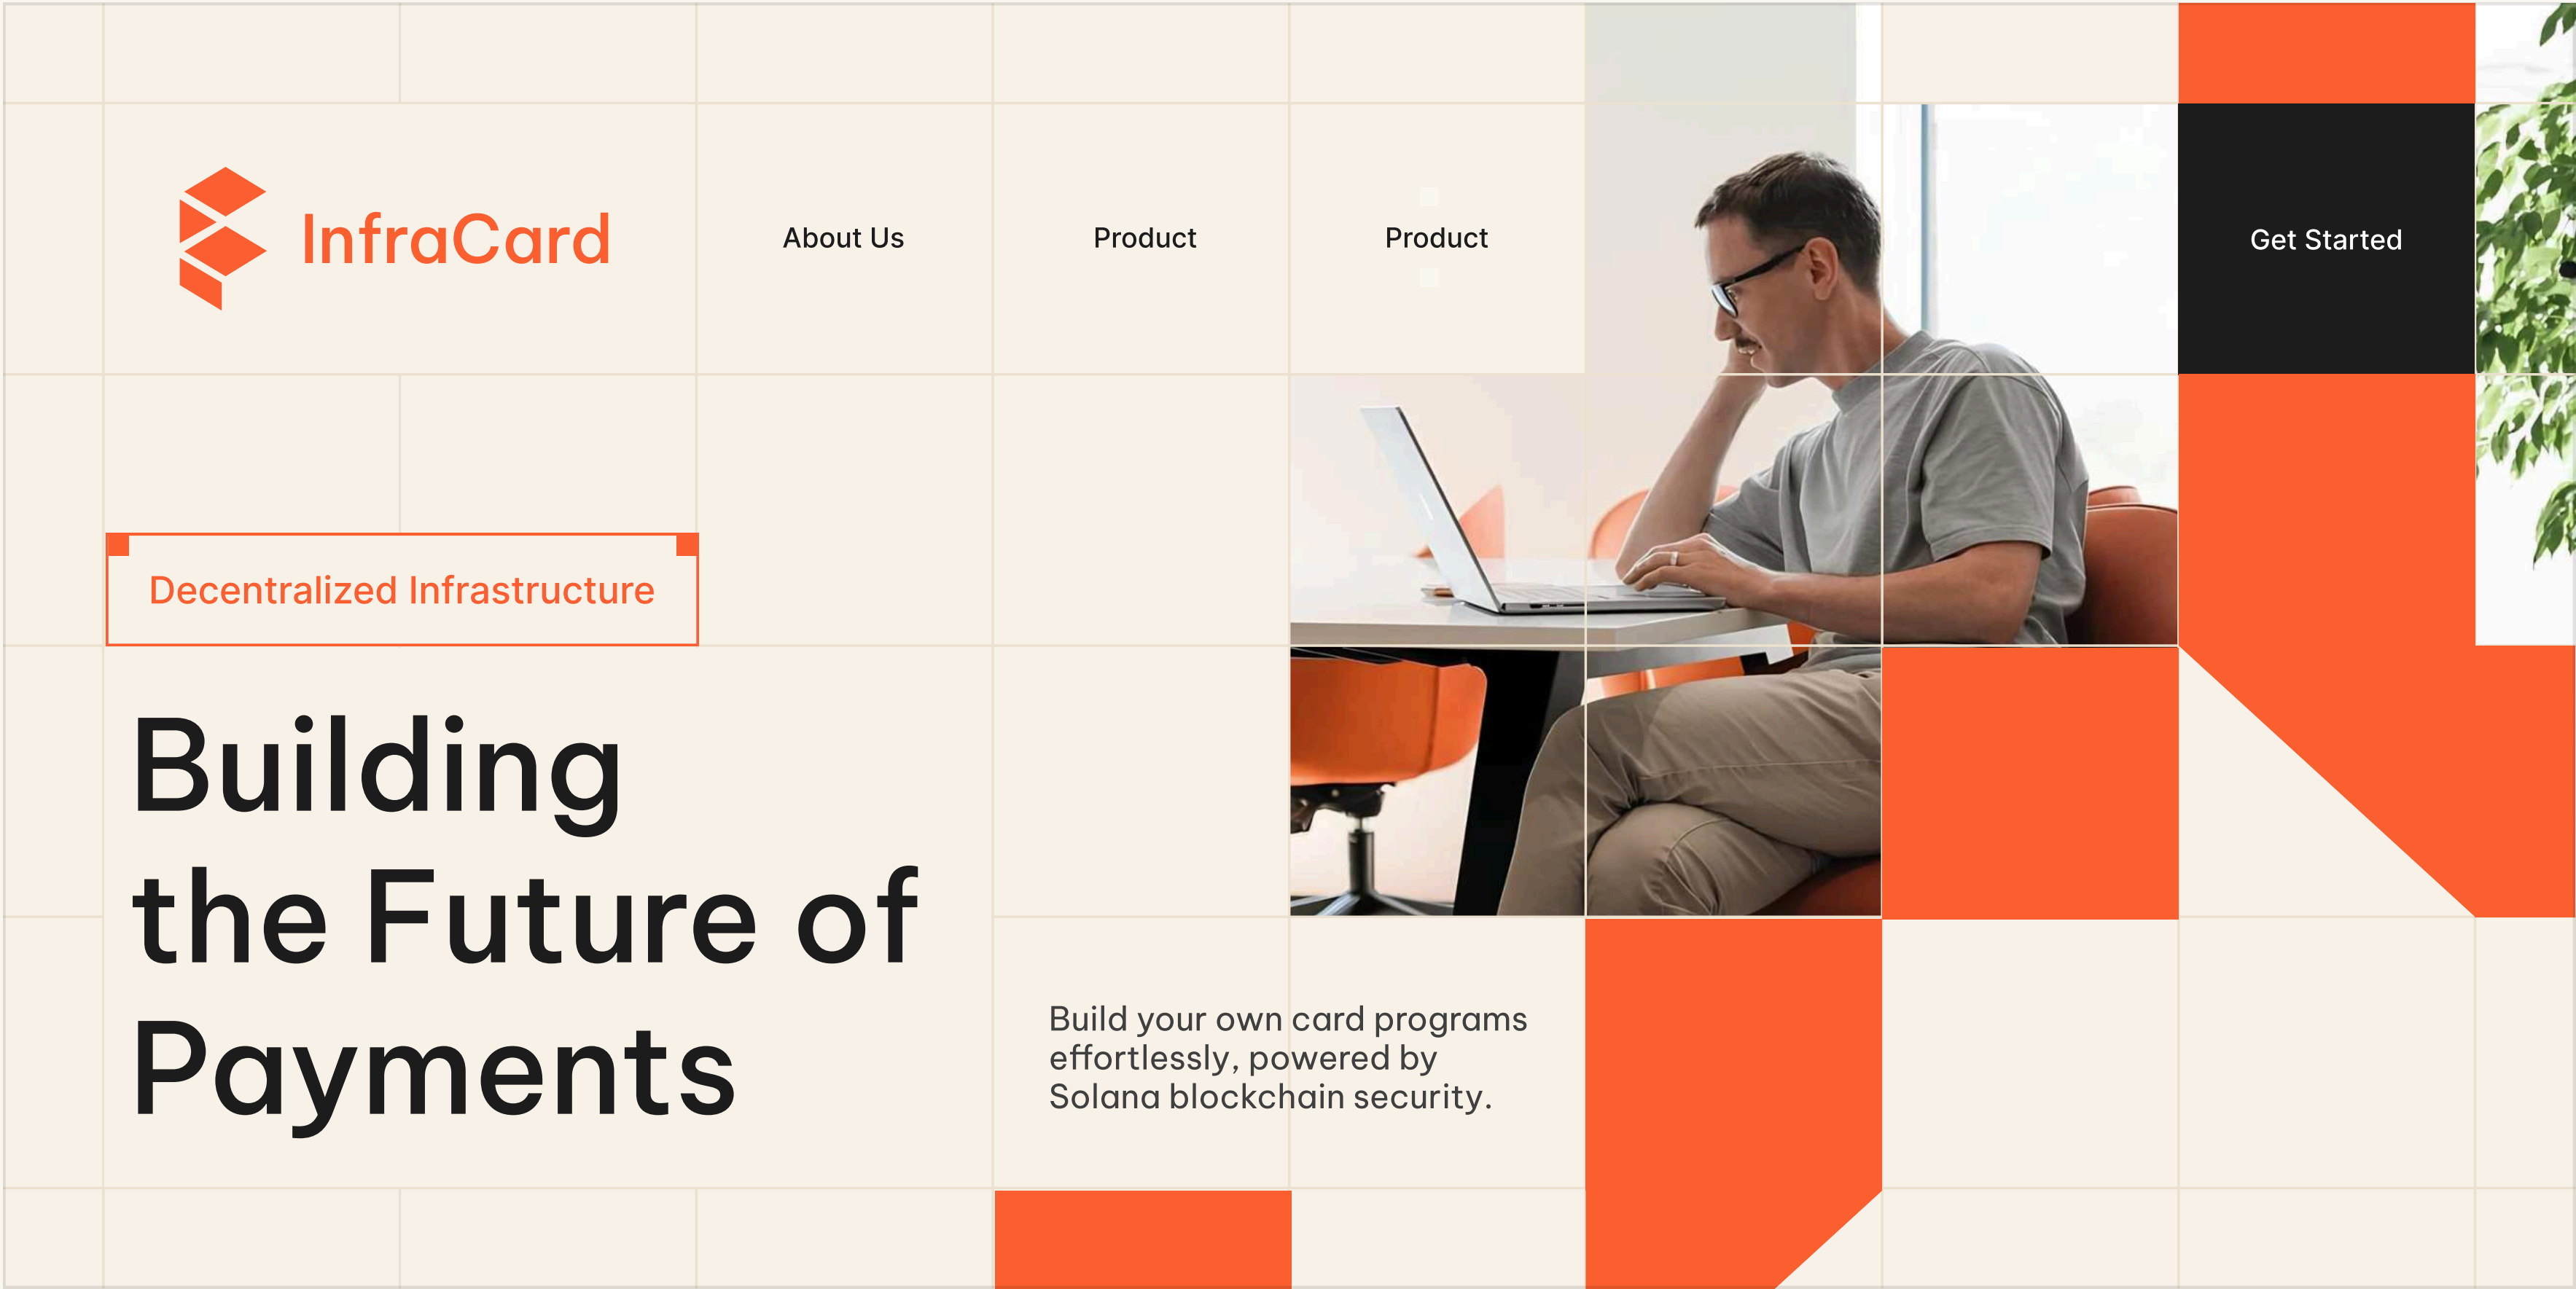

Website

A concept using lines in a minimalist style without additional elements. This direction can also be executed with other geometric shapes.

Website

A photographic approach structured with a modular grid system.
